

GROUP TRAINING SESSIONS

GROUP COMPETITION DAY

iZone's Group Competition Training is designed to expose Karters to the stress of competition in an environment where they can learn from their mistakes, condition the right mindset and gradually build mental resilience around a clearly understood method. Each day involves up to six drivers split into two teams and in addition to the simulator training and drills drivers will also take part in physical and psychomotor tests in the gym.

AFTER SCHOOL PHYSICAL & PERFORMANCE TRAINING

iZone's Weekly Home Physical and Performance Training is an after-school training programme that runs five days a week for 30 minutes each weekday. It is designed to support Karters with their physical training, their knowledge of key aspects of their sport, their ability to concentrate and visualize and also their ability to keep focused on their goals.

SCHOOL HOLIDAY FITNESS CAMPS

Our School Holiday fitness camps are a full day of training specifically to enhance your physical and mental performance for Karting. The day starts with a group HIIT session which is designed to test the drivers and reinforce their skills in every area that influences their on-track performance. There will be mental training including mindfulness breathing exercises, visualisation and goal setting for the day. Followed by an hour of competitive physical and psychomotor tests. Following this there will be group studio classes such as Yoga and Boxing. Throughout the day there will also be challenges and exercises given across five zones of training. Each Zone trains specific skills and also creates constant pressure as each activity is benchmarked and recorded on each Zone's specific leaderboard. The Five Zones include: Mind Zone, Psychomotor Zone, Strength Zone, Cardio Zone and Simulator Zone.

SCHOOL HOLIDAY DEVELOPMENT DAYS

This half day of training has been designed to allow new clients to iZone to experience both our unique training methods and KartSim's advanced simulator and software system. The programme combines technical briefings with practical simulator training (both in the wet and the dry), so that when drivers leave they have a clear understanding of the areas they need to work on to improve their on-track performance.

HIIT AND ZONE TRAINING

Our Zone Training facility gives our drivers the unique opportunity to train regularly in all of the areas that create on-track performance. Each Zone trains specific skills and also creates constant pressure as each activity is benchmarked and recorded on each Zone's specific leaderboard. The Five Zones include: Mind Zone, Psychomotor Zone, Strength Zone, Cardio Zone and Simulator Zone. Every morning at IZone starts with a two and a quarter hour group HIIT session which is designed to test our drivers and reinforce their skills in every area that influences their on-track performance. The session starts with mental training including mindfulness breathing exercises, visualisation and goal setting for the day. Followed by an hour of competitive physical and psychomotor tests and finally head to head competition on our training simulators. The idea is to make competition and performing under pressure an everyday occurrence for our drivers.

GROUP STUDIO CLASSES

iZone's group studio classes give driver's the opportunity to add variety to their training routine as well as learning key skills related to their physical and mental performance. Classes include Yoga, Boxing, Pilates, Circuit and HIIT.

TRAINING SEMINARS

Every month we run training seminars on a wide variety of subjects that allow our drivers to broaden their understanding of key aspects of their sport - areas that we would not normally have time to cover in a normal coaching session. Topics that will be covered include: Sponsorship, Media Training, Nutrition, Social Media & PR, Talent Acquisition, Race Car Engineering, etc.

HALF DAY TEAM PHYSICAL

A half day training session for a team of Karters which includes individual training and fun, competitive training so the drivers can benchmark themselves and compete against other drivers. The exercises will be based on key fitness components required for Karting such as upper body strength, core strength, reactions, balance, co-ordination and cardiovascular fitness.
