

KART DRIVER TRAINING

# HOME SIMULATOR TRAINING

## REMOTE COACHING SESSIONS

Designed specifically for Karters who have their own simulators at home we have created a coaching package that allows us to provide one to one coaching and analysis via an online service. We provide software that allows us to monitor the simulator screen so that we can give live coaching, and we combine this with bespoke training that ensures that Karters are able to develop their technique and understanding in a structured environment.

## COMPREHENSIVE HOME TRAINING PROGRAMME

For drivers who have their own simulators at home we have created a comprehensive home training programme that includes remote simulator coaching, mental conditioning, fitness training, and psychomotor training, together with regular pressure sessions that are benchmarked against the performance of our other drivers.

## IT AND ENGINEERING SUPPORT

iZone have a full time Engineer and IT specialist so we are able to provide support to drivers with their simulator software and hardware together with development of car models.

To find out more or to book a session please get in touch and we'll get back to you:
